“Dream” Book
Aquascapes

By: Green Acres Inc

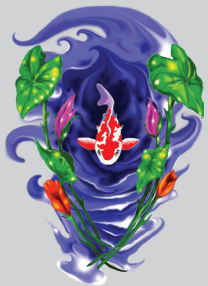

Relax, Enjoy, Live.

Join the Pond Lifestyle

All across America, high maintenance, boring expanses of lawn are being transformed into beautiful, low maintenance, affordable water features! Every day, millions of people return home to recuperate from their hectic day by relaxing alongside a soothing, gurgling waterfall. Today, we invite you to join ranks with the many satisfied homeowners who readily profess adding a water feature to their landscape was the best investment they've ever made!

Ecosystem Ponds

Having all the correct components in place makes all the difference in the health and success of your Ecosystem Fish Pond. We use them to work with Mother Nature, not against her, for a chemical-free wonderland of water! The truth is that most people opt for the ecosystem way of water gardening because it's easier and it just makes sense. A low-maintenance ecosystem fish pond provides you with more free time to enjoy friends and family ... while gathered around your pond, of course!

The 5 Essential Components to an Ecosystem Pond

Come Home to Paradise

The Dragonfly

8x11 Ecosystem Pond
Rock and Gravel Construction
2' Max Depth
Up to 10" Waterfall on pond edge

\$ 7,000.00

- **Larger Sizes Available**

The Lotus

11x16 Ecosystem Pond
Rock and Gravel Construction
2' Max Depth
Up to 10" Waterfall on pond edge

\$ 10,000.00

Water Feature Upgrades Available for either option above.

Relax, Enjoy, Live.

Pondless Waterfalls

Pondless Waterfalls or Disappearing Waterfalls are simply a re-circulating waterfall and/or stream without the presence of a pond. You can enjoy the sight and sound of running water without the maintenance of a pond.

The waterfall is undoubtedly the most beautiful and favored feature in a water garden. If space is lacking in your yard or you have safety concerns with a pond, go Pondless! The name basically explains it all. It's a waterfall and stream, without the pond. So why would you want a waterfall without a pond? The truth is that a Pondless Waterfall isn't for everyone, but it can be a great alternative for someone who isn't quite sure if a pond is right for their family.

Come Home to Paradise

The Bubbling Spring

5' Pondless Waterfall
12-16" Width Stream
Rock and Gravel Construction
Up to (2) 6" Drops

Ionizer

Electronic Clarifier for Ponds and Pondless Waterfall Systems

The Ionizer Electronic water clarifier drastically reduces maintenance caused by algae without the use of chemicals. A microprocessor inside the ionizer releases ions from a scientifically blended and tested probe that achieves maximum treatment results in water features.

- Drastically reduces pond maintenance
- Helps to eliminate unsightly algae without the use of liquid chemicals
- Compatible with water containing fish and plants
- Energy efficient (less than \$1 per month in electrical costs)

Before Ionizer

After Ionizer

Notes:

- 1) To obtain maximum results we highly recommend that the pond not already have a severe algae bloom or receive a full pond clean-out prior to the installation of the Ion Gen.
- 2) The Ion Gen will need to be plugged into an available electrical outlet located close to installation area. The addition of an electrical outlet, if needed, is not included in the cost of installation.
- 3) The use of Beneficial and Sludge bacteria is still necessary.

Includes: Professionally Installation, Scheduled Check Visit one month after installation to check water parameters and adjust calibration. 2 year parts and labor warranty on control unit. The probe is a replaceable item. It does wear out, typical usage is 1 probe per year, they can last longer depending on ionizer setting for your pond.

\$ 900.00

Relax, Enjoy, Live.

Dosing System

Water Treatment Dosing System

How often do you forget to add your water treatments?

You then go outside and your pond is murky, algae ridden, or the sludge build up has gotten out of control. The water treatment dosing system will take away the pressure of trying to remember to add water treatments, no more measuring water treatments, spilling water treatments, or trying to remember how much to add. For most fish ponds, pondless waterfalls and fountains this unit will just need to be set and the treatment bag changed once a month or less. This unit does it all!

What's Included:

- Professional Installation of Dosing Unit on 4x4 post with cap
- First bag of water treatments (Maintain)
- Instruction on Dosing System Functions and Use
- Scheduled "Check" Visit one month after installation to insure proper function
- Monthly Email to remind you to check treatment bag for replacement
- We will need access to a free electrical outlet (Electric Service Not Included)
- 2 yr Warranty on Unit (Parts and Labor)

One dosing system and bag will treat a 2000 gallon pond for approximately one month. If your pond is larger than 2000 gallons we recommend adding another dosing system so the treatment bag needs to be replaced only once a month. Our recommendations are below:

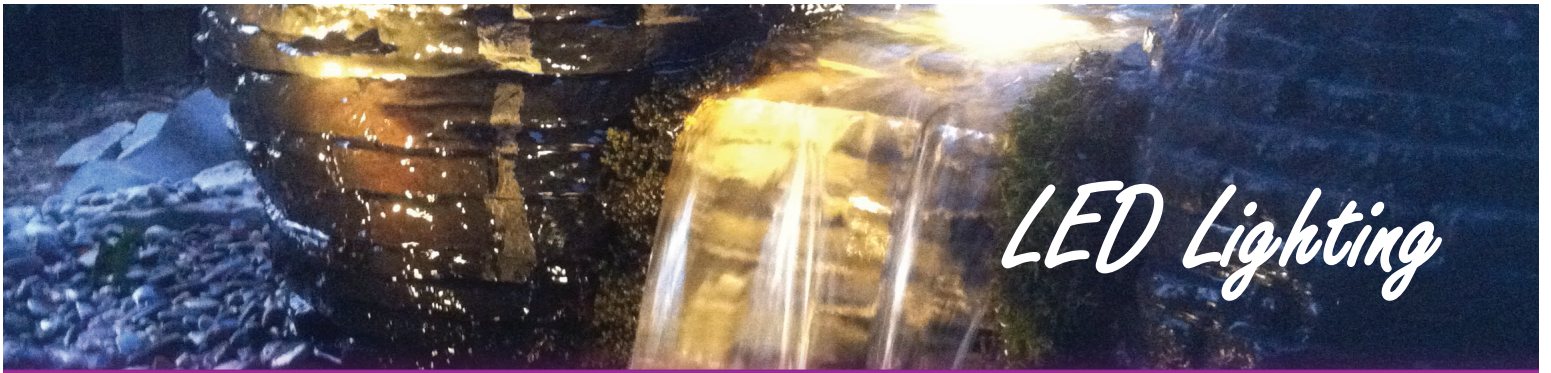

For Ponds up to 2000 gallons and Pondless Waterfall/Fountain:

One Automatic Dosing System \$ 700.00

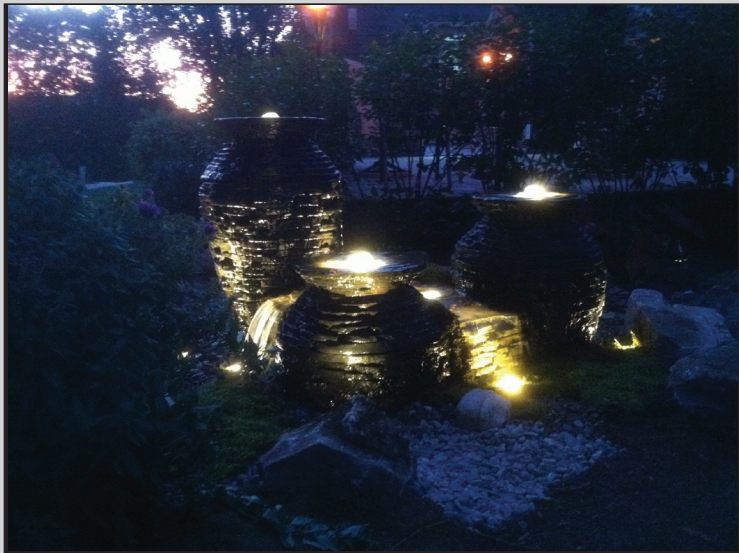

For ponds 2000 to 4000 gallons:

Two Automatic Dosing Systems \$ 1100.00

LED Lighting

Add a new dimension to your pond by bringing it to life at night with underwater pond LED lights . Dramatic and different, delicate and beautiful, breathtaking and awe-inspiring are just some of the ways our clients have described their night ponds. Today's busy schedules and lifestyles sometimes leave little time for us to see daylight at home, and it is often difficult to enjoy our pond or landscape during the day.

Our complete line of pond and landscape LED lighting, provide maximum enjoyment of any water garden – day or night

Aquascape LED pond lights come with a 5 year manufacturers warranty.

We also install the full line of Landscape Lighting from Kichler and Unique Lighting. Some with a Lifetime Warranty

1-Watt LED
